

Sing: "The Family of the Sun"
(original author unknown)
(tune... "Farmer in the Dell")

Chorus:
The family of the Sun,
The family of the Sun,
There are eight planets in
the family of the Sun.

Jupiter is big.
We've studied it a lot.
We found that it has lots of moons,
And a big, red swirling spot.

Repeat Chorus

Mercury is hot,
And Mercury is small.
Mercury has no atmosphere;
It's just a rocky ball.

Saturn has big rings
We wondered what they were.
Now we know they're icy rocks
Which we once saw as a blur.

Repeat Chorus

Repeat Chorus

Venus has thick clouds
That hide what is below.
The air is foul; the ground is hot.
It rotates very slow.

Uranus is far.
It's cold and greenish-blue.
We found it rotates sideways,
And it has a lot of moons.

Repeat Chorus

Repeat Chorus

We love the Earth our home,
Its oceans and its trees.
We eat its food; we breathe its air,
So no pollution, please.

Neptune has a spot;
A stormy patch of blue.
The planet has a lot of clouds
And rings around it, too.

Repeat Chorus

Repeat Chorus

Mars is very red.
It's also dry and cold.
Some day you might visit Mars
If you are really bold.

Pluto's last in line
It's farthest from the Sun.
They say it's not a planet now,
Which isn't very fun.

Repeat Chorus

Repeat Chorus
